PROFESSIONAL SUMMARY

Computer Science graduate and Java Full Stack Developer with hands-on experience in Java, Spring Boot, Spring Security, REST APIs, React.js, MySQL, Redis, JWT, and Docker. Experienced in developing backend services, RESTful APIs, secure full-stack applications, and integrating Generative AI capabilities using LLM APIs and prompt engineering. Familiar with Retrieval-Augmented Generation (RAG), vector databases, AI agent workflows, and AI-powered application development. Certified in Java Full Stack Development from Rest Coder Academy, seeking an entry-level Java AI Software Engineer role.

EDUCATION

Bachelor of Computer Science, Dayananda Sagar University 2022 – 2026

SKILLS

Programming Languages	Java, JavaScript, Python, C++
Backend	Spring Boot, Spring Security, REST APIs, JDBC, JWT
Frontend	HTML5, CSS3, JavaScript (ES6), React.js
Databases	MySQL, PostgreSQL, MongoDB, Redis, Vector Databases
Generative AI	OpenAI API, Gemini API, LLM Integration, Prompt Engineering, RAG
AI Frameworks	LangChain, LangGraph, AI Agent Workflows
DevOps & Tools	Docker, Git, GitHub, Postman, IntelliJ IDEA, VS Code
Core CS	Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Java Full Stack Development Program Feb 2026 – Sep 2026
Rest Coder Academy *Bangalore, India*

- Developed a full-stack Player Management System using Java, Spring Boot, JDBC, MySQL, and React.js, implementing backend services and scalable RESTful APIs.
- Implemented CRUD operations and database integration using Java, JDBC, and MySQL, with focus on application reliability, debugging, and efficient data management.
- Designed and developed RESTful APIs using Spring Boot to enable secure communication between frontend and backend services.

PROJECTS

Event Booking System with Seat Locking (GitHub)

- Developed a full-stack event booking platform using Java, Spring Boot, React.js, MySQL, Redis, REST APIs, JWT, and Docker.
- Implemented Redis-based distributed seat locking with a 5-minute TTL to prevent double-booking during concurrent booking requests and automatically release expired locks.
- Secured REST APIs using Spring Security and JWT-based authentication, and tested concurrent booking scenarios to validate application reliability and performance.

ACHIEVEMENTS

- Qualified JEE Advanced in 2023.
- Solved 150+ Data Structures and Algorithms problems on LeetCode.
